

For Immediate Release

GLORY (U.S.A.) Inc. Continues to Enhance Its Portfolio of Cash Recyclers with the Release of the RBG-100

GLORY's new intelligent cash recycler brings the latest in cash management technology to financial institutions.

WEST CALDWELL, NJ, – January 23, 2012 – GLORY (U.S.A.) Inc., www.gloryusa.com, the leader in cash management solutions announced today the launch of an efficient high performance new cash recycler incorporating GLORY's new intelligent cash management technology. The RBG-100 iCR™ is designed to be installed in teller lines to process customer transactions, night deposits and teller vault buys and sells.

Using its rich history of innovation and expertise in the placement of over 110,000 cash recyclers worldwide, GLORY creates the true next generation of cash recyclers that incorporate intelligent systems for the daily management of cash inventory in banks and financial institutions.

This intelligent recycler technology establishes the new benchmark for cash recyclers by providing these key benefits:

- **Significant Increase in Capacity**
Up to 17,100 note capacity includes approximately 12,600 recyclable notes and a secure 4,500 deposit only collection drawer.
- **Auto Verification**
Performs internal automatic verification to ensure balanced cash inventory.
- **Configurable Cassettes**
Cassettes can be easily configured by denomination.
- **Enhanced Security**
The approved UL-291 safe allows for overnight storage of cash inventory. No need to remove cash to an external vault.
- **Contemporary Compact Design**
Innovative cassette design provides increased capacity and security.

"As the leader in development and manufacturing of quality cash handling equipment, our new technology allows us to again establish the benchmark. With over 60 years of developing cash management solutions we listen to our customers and deliver solutions that meet their changing business needs", said Rick Friese, SVP Sales for GLORY (U.S.A.) Inc.

"The new RBG-100 signifies the next in a series of intelligent cash recyclers utilizing the latest in technology. Designed for high volume branch activity, it produces increased efficiency of cash funds management, greater reduction in operating costs, and increased security and capacity, reinforcing GLORY's leadership in cash management solutions," said Friese.

GLORY's reliable solutions can be found in 27 of the top 50 US Banks and over half of the top 50 US Credit Unions. To learn more about the exciting new RBG-100 intelligent cash recycler and how GLORY can help meet cash management challenges of today please visit us at www.gloryusa.com
